

People's Pavilion

case study
By Yanan Qian

Location: Strijp, Eindhoven, Netherlands

Architect: bureau SLA

Owner: N/A

Year of completion: 2017

Climate: Cfb

Material of interest: recycled plastic

Application: Exterior

Properties of material: The pavilion boasts a colourful facade of shingles made from recycled plastic, as well as a wooden framework made from components that were borrowed, and which will be returned to their owners intact once Dutch Design Week is over.
